LETTER OF RECOMMENDATION

It is with great pleasure that I provide the following letter of recommendation for "Nurukurthi Veera Venkata Ganesh." with Regno RA1911027010109. Since I'm an Associate Professor, I've had the privilege of instructing him in courses like "Indian Traditional Knowledge." I've known him since he originally enrolled in my class three years ago. He maintained his academic ability and finished at or near the top of his class for the entirety of the coursework.

As his faculty advisor, I guided him through his BTech degree and the subsequent internships. He was wise beyond his years because of the way he projected his intellectual qualities through a wide array of abilities. He is among the best and brightest students in our class. He took advantage of his exceptional leadership skills to guide his subordinates and encourage them to conduct technical research using the lab's facilities.

Ganesh manages to maintain a healthy equilibrium between curricular and extracurricular activities. I was able to experience his natural leadership skills firsthand in his role as a student coordinator for the many cultural festivals, to a great extent due to the breadth of his understanding gained through the Indian traditional knowledge course. In group situations, he contributes effectively and efficiently, and his presence is boosted as a result of his impressive achievements.

My strongest support and recommendation would be given to Ganesh if he were to apply to your prestigious university. Because, provided the appropriate circumstances and academic resources, he will progress up the ladder in terms of the acquisition of knowledge, I recommend that he be admitted to the course that he has selected while also receiving the appropriate financial support. This is because he will move up the academic ladder if the right things happen and he has the right tools.

With Regards,

27/10/22

Dr. A. Shanthini,
Associate Professor,
Department of Data Science and Business System,
Faculty of Engineering and Technology,
